EXPERIENCE

Software Developer & Embedded System Developer

Freelance | Part-Time | Nov 2024 - Apr 2026

- Developed 10+ web and IoT-based projects using PHP, Next.js, MySQL, PostgreSQL, and Arduino
- Built software and automation systems including queueing, library and inventory management, earthquake detection, line-tracing robots, sumo robots, and automated egg-sorting machines.
- Performed system testing, debugging, and database integration to ensure project functionality and reliability

Technical Support Technician

ANYK Internet Café | Part-Time | Jun 2016 – Jun 2018

- Maintained workstations, performed OS installations, network configuration, and basic repairs
- Resolved hardware, software, and network issues across 40+ computer units, minimizing downtime and maintaining smooth daily operations
- Configured IP addresses and installed RJ45 cable connections to support stable network and internet performance
- Provided services to customers with printing services, document processing, peripheral troubleshooting, and basic OS issues
